**SHOBHA MIX**

It's no secret that Shobha is one of my favorite salons around - not only because they have some [genius products](#) and [stellar services](#), but also because there's something about the space and people that's just really cool. Maybe it's how their rich jewel tones make every visit feel like a festive occasion, or maybe it's how knowledgeable their staff is about what's good for you, or maybe it's just that sophisticated worldliness they have about them. But I always look forward to my appointments and wish that I could channel a little bit of their style in my daily, non hair removing life. Perhaps one day I'll have a magenta, orange and turquoise apartment, but until then, I'm going to have to emulate their style through ambiance. Good thing Shobha just released their first [Salon Mix](#), which you can download via iTunes. It's a mix of worldly beats ranging from Panjabi MC to Zero 7. An instant favorite I discovered from them is a song called "Twisted Cupid" by [Slow Train](#). Good for chilling out or rocking out, The Shobha mix makes

you feel like you just got a peek at what the coolest kid in town is listening to.

P.S. Their 2 for 1 deal is still going on for a few days so make sure you bring a friend to check it out.
