CP Steal: The Anti-Bump

By Ashley Goldsmith

SHARE

I'm sure you dedicated readers caught up on my guide to at-home hair removal in our June issue, where I gave you tips on preventing and treating razor burn. Though I trust that you've followed my instructions carefully, I know that sometimes life takes over and you can't help but stray from your routine...a quick shave before heading out to the beach, brows still red from last minute waxing before a date, it happens. Without following through with exfoliating and post removal moisturizing, the unwanted redness is bound to make an appearance.

Enter **Shobha**, the brand's **Ingrown Lotion** is a perfect all-natural fix for those moments when you barely have time to brush your teeth. The lotion contains glycolic acid for exfoliating, tea tree oil for protection, chamomile for soothing and glycerin for moisturizing and is also paraben, color and fragrance free. At only 2oz it's perfect to keep in your bag for a little soothing when you're out and about or can also be added to your carry on for your next tropical vacation.

Since here at BN we want to keep you feeling silky smooth all summer long we've teamed up with Shobha to offer an exclusive coupon to our readers. Simply log on to <http://www.myshobha.com> add the Ingrown Lotion to your cart and copy this coupon code (**0709IRL523**) at checkout to receive \$5.00 off your purchase of the lotion. The offer runs through August 1st, so hurry!
