

Beautiful Brows

Natural-looking arches are the framework for a stunning face. Get them with these four simple rules.

1. Draw the line.

Use a brow powder to fill in sparse spots before you tweeze. This will help you find and pluck strays without overpruning.

2. Lighten up.

Choose fillers that are one shade lighter than the color of your brows for a more believable effect.

3. Spot treat.

Mask bare areas by making feathery strokes with a brow pencil in the opposite direction of hair growth.

4. Comb over.

Just as you smooth strands in the a.m., avoid brow "bed head" by combing wonky hairs with a small brush.
