Nix hair everywhere

Sure, bump-free, smooth legs and bikini lines are always on-trend for beach-worthy days, but this summer, it's all about going completely bare. "We're seeing a huge uptick in the number of full-body waxing treatments — including full arms, chest, stomach and back — that we're performing this spring and summer compared to past years," says Jennifer Pesce, a hair removal expert for New York City's **Shobha** salons. "Some clients say that they like the way it leaves their skin free of any peach fuzz, but also really smooth all over — like an added exfoliation treatment." To soothe skin post-wax, try **Shobha's Rosewater Freshening Cloths** (\$9) for the face, body, and bikini area. They're paraben- and artificial-fragrance-free, and come in single packets that you can easily toss into your beach bag to also swipe away sweat and grime that can clog pores and cause ingrown hairs.
