2. Shoba Sugaring Kit

Green and All Natural

Type: [Sugaring gel](#)

Best for: Body and bikini

This is not wax, but it works the same way by in the way that it's applied, removed and uplifting hair from the root. Because it's all natural (you can literally eat the ingredients) many men and women prefer sugaring in its true form, finding waxing more irritating to the skin and painful than sugaring. Clean up is a cinch since it washes with water.

What I also adore about [sugaring](#) is that you can reapply it over missed hair without worrying too much about it upsetting healthy skin too much. (Soft wax is not supposed to be reapplied over skin). This is a great feature for anyone, but especially novices removing hair at home.

You get everything you need to de-fuzz with the microwavable can of sugaring gel, including denim strips, spatulas and talc-free powder. The denim strips' weight help reduce pain and can be washed, saving money and reducing waste. [More »](#)
